Call for Participation

Service-oriented systems pose novel challenges to software engineering, stemming from the lack of homogeneity of their basic components and from the requirement of being able to accommodate unprecedented levels of changes and dynamic evolution. Increasingly, services will be offered via the Internet through emerging delivery models such as software-as-a-service (SaaS), business process outsourcing (BPO), cloud services and third-party services. This means that future software systems will increasingly rely on the provisioning of services, which are no longer under the software engineer’s control. Those trends are reflected in the special theme of the 4th edition of PESOS: “Internet of Services”.

The goal of PESOS 2012 is to bring together software engineering researchers from academia and industry, as well as practitioners working in the areas of service-oriented systems to discuss research challenges, recent developments, novel application scenarios, as well as methods, techniques, experiences and tools to support engineering, evolution and adaptation of large-scale, highly-dynamic service-oriented systems.

For the first time, PESOS will feature a special session on “the quest for case studies”. The special session aims to serve as a forum for researchers and practitioners sharing this vision and willing to contribute with their effort and experience. The ultimate goal is to create a reference set of case studies for the research community in service-oriented systems, hosted on a publicly available repository. The session will be organized as a working session in which participants can present their experience and lessons learned.

Programme Outline

Keynote speech
Carl Worms, Enterprise Architect, Credit Suisse IT Private Banking

Regular Workshop Presentations, featuring contributions addressing any of the topics related to software engineering for the “Internet of Services”, SOA, Web services, cloud computing, and connected areas.

Case Study Presentations, featuring descriptions of case studies in the area of service-oriented systems, and its related artefacts (e.g., service interfaces, process descriptions and models, SLAs and monitoring data), as well as reports on experiences in using case studies in research for service-oriented systems.

Organising Committee
Patricia Lago, VU University Amsterdam, The Netherlands
Grace A. Lewis, CMU Software Engineering Institute, USA
Andreas Metzger, Palermo (The Ruhr Institute for Software Technology), University of Duisburg-Essen, Germany
Vladimir Tomic, NICTA, Australia

Special Session Organizers
Domenico Bianculli, University of Lugano, Switzerland
Antinisco Di Marco, University of L’Aquila, Italy
Pier Luigi Pedani, Politecnico di Milano, Italy
Andrea Polini, University of Camerino, Italy

Steering Committee
Schahram Dustdar, TU Vienna, Austria
Carlo Ghezzi, Politecnico di Milano, Italy
Domenico Laforenza, IIIT-CNRI & ISTI CNR, Italy
Frank Leymann, University of Stuttgart, Germany
Mike Papazoglou, Tilburg University, The Netherlands
Klaus Pohl, Palermo (The Ruhr Institute for Software Technology), University of Duisburg-Essen, Germany

Program Committee
Antonio Brogi, University of Pisa, Italy
Matthias Böck, Palermo, Univ. Duisburg-Essen, Germany
Myra Cohen, University of Nebraska, USA
Marlon Dumas, University of Tartu, Estonia
Schahram Dustdar, TU Vienna, Austria
Howard Foster*, City University of London, UK
Qing Gu, VU University Amsterdam, The Netherlands
Sam Guiney, Politecnico di Milano, Italy
Sylvain Hallé*, Univ. du Québec à Chicoutimi, Canada
Wilhelm Hasselbring*, University of Kiel, Germany
Dragan Ivanovic*, Univ. Politecnica de Madrid, Spain
Raman Kashamaklin, FBK, Italy
Heiko Koziolek*, ABB Corporate Research, Germany
Kyriakos Kritikos*, University of Crete, Greece
Morin Litou, York University, Canada
Nicolás López, University of Los Andes, Colombia
Hanau Lutfy, University of Western Ontario, Canada
Marija Milic-Rakic*, Google Los Angeles, USA
Liam O’Brien, CSIRO, Australia
Flavio Oquendo, Eu. Univ. of Brittany/IRISA-UBS, France
Cesare Pautasso, Univ. d. Svizzera Italiana, Switzerland
Florian Rosenberg*, IBM Research Lab, USA
Antonio Ruiz, University of Seville, Spain
Antonino Sabetta*, SAP Research, France
Tarja Systo, Tampere University of Technology, Finland
Liming Zhu, NICTA, Australia

* = Member of special session evaluation committee
